

DRINKING WATER QUALITY PUBLIC SUPPLIES

Drinking water quality public supplies 2020

If there's a problem

National priorities

- Disinfection keeping water free of pathogens
- Trihalomethanes minimising disinfection by-products
- Lead eliminating lead from our networks
- Pesticides preventing them from entering our waters
- Water Safety Plans managing the risks to our supplies

Irish Water to take action to address these priorities

What you can do

- Replace any lead fittings in your home
- Don't waste water
- Use pesticides responsibly
